Monthly commentary

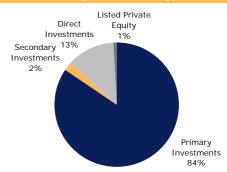

During the month of March, the net asset value (NAV) of Princess decreased by 8.18% to EUR 7.83 per share, resulting in a NAV total return of -5.26% for the first quarter of 2009. As indicated in the Princess annual report, Partners Group, the Investment Advisor to Princess, could not rule out NAV declines despite the partial anticipation of such likely NAV write-downs by general partners through its monthly IFRS revaluations. The impact of the 2008 year-end reports received from general partners during the month of March accounted for a decline of 5.64% of the NAV and primarily stemmed from large-cap and higher mid-cap buyout funds. Another significant negative return component in March was the depreciation of the US dollar against the Euro which led to a decrease of 2.44% of the NAV. The residual is explained by IFRS revaluations, costs and other items.

In March, SunGard, a portfolio company of Princess partnerships Blackstone Communications Partners I and TPG Partners III and one of the world's leading software companies that provides services for financial, higher public market segments, acquired education and Performance Pathways Inc, a leading provider of instructional management software for primary and secondary schools. This transaction aims to expand SunGard's existing education unit, allowing it to offer a unique value proposition to school districts, consisting of a unified system for student, instructional and financial management. The acquisition of Performance Pathways is not expected to have material impact on SunGard's financial results.
